Fozeus: A Blockchain Based Novel Ecosystem

April 1, 2023

This introductory paper was originally published on 8th of April, 2021 by Tom Veber, the founder of Fozeus ecosystem, before the project's launch on 20th of October, 2021. It's worth noting that Fozeus ecosystem, like many community-driven, software projects, has evolved since its initial inception.

While several years old, we maintain this paper because it continues to serve as a useful reference and an accurate representation of Fozeus ecosystem and its vision.

Abstract

The evolution of the blockchain is very similar to the evolution of the internet. The use of blockchain technologies in many industries and in the appearance of even more efficient blockchain protocols leads to the replacement of centralized proprietary services with decentralized open ones; trusted parties are replaced with verifiable computations; brittle location addresses are replaced with resilient content addresses; inefficient monolithic services are being replaced with peer-to-peer algorithmic markets.

Technological mini-revolutions are constantly taking place in the field of decentralized financial services (DeFi). With the advent of the Fozeus ecosystem, which plans to attract 1/8 of the world's population to its products and unite them into a single whole with this ecosystem, the problem of a smooth transition of humanity to the world of decentralized finance will be solved.

Despite the high promises, the creation of a decentralized, secure and scalable public blockchain proved to be a difficult task for predecessors, the novel Fozeus ecosystem propose a solution to justify high trust through a group of its products that will shape this unique ecosystem through constant and continuous interaction with each other.

This document:

- (a) Introduces the novel Fozeus ecosystem
- (b) Describes the definition and theory behind that ecosystem
- (c) Introduces a group of products that form Fozeus ecosystem and their interactions
- (d) Explaining the different aspects of the implementation of those products
- (e) Formalizes the impact of introducing novel ecosystem on the community

Note: Fozeus is a work in progress. Active research is under way, and new versions of this paper will appear at <https://fozeus.io>. For comments and suggestions, contact us at support@fozeus.io.

Disclaimer

PLEASE READ THIS SECTION CAREFULLY. IF YOU ARE IN ANY DOUBT AS TO THE ACTION YOU SHOULD TAKE, YOU SHOULD CONSULT YOUR LEGAL, FINANCIAL, TAX OR OTHER PROFESSIONAL ADVISOR(S).

The Fozeus Whitepaper has been published and issued for informational purposes only and is required to be read alongside the Terms if the prospective purchaser plans to use any of the Fozeus ecosystem products.

This Whitepaper is a working document and is subject to changes and errors. Any purchase or use of services from Fozeus creates a binding arbitration agreement between Fozeus and the user/purchaser as the Terms are outlined.

This Whitepaper does not constitute a prospectus for the purposes of [Directive 2003/71/EEC, and the amending directive 2010/73/EU] [Regulation (EU) 2017/1129], and is not intended to constitute an offer of securities or a solicitation for investments in securities in any jurisdiction.

The purpose of this Whitepaper is to provide potential purchasers with the information on Fozeus ecosystem to allow the purchasers to make their own decision as to whether or not it wishes to proceed to purchase FZS Tokens and use any of the Fozeus ecosystem products.

This Whitepaper does not constitute an offer or invitation, or any other sale or purchase of shares, securities, or any of the assets. Any possession of FZS shall not grant any rights in any form to the user, including but not limited to any rights of ownership, interest, profit, redemption, property or intellectual property, decision making, or any other such rights, such as any rights of financial or legal nature, in Fozeus the corporation or its affiliates. FZS may be used for protocol and ecosystem governance which has no bearing to the corporation or its affiliates.

Fozeus does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in this Whitepaper. Fozeus does not guarantee or warrant the site will be uninterrupted, without delay, error-free, omission-free, or free of viruses. Therefore, the information is provided “as is” without warranties of any kind, express or implied, including accuracy, timeliness and completeness.

This Whitepaper, any part thereof and any copy thereof must not be taken or transmitted to any country where distribution or dissemination of this Whitepaper is prohibited or restricted. No part of this Whitepaper is to be reproduced, distributed or disseminated without including this section.

Risks

You acknowledge and agree that there are numerous risks associated with purchasing FZS, holding FZS, and using FZS for participation in the Fozeus ecosystem. In the worst scenario, this could lead to the loss of all or part of the FZS which had been purchased. IF YOU DECIDE TO PURCHASE FZS, YOU EXPRESSLY ACKNOWLEDGE, ACCEPT AND ASSUME THE FOLLOWING RISKS:

1. Uncertain Regulations and Enforcement Actions

The regulatory status of FZS is unclear or unsettled in many jurisdictions. The regulation of virtual currencies has become a primary target of regulation in all major countries in the world. It is impossible to predict how, when or whether regulatory agencies may apply existing regulations or create new regulations with respect to such technology and its applications, including FZS and/or the Fozeus ecosystem. Regulatory actions could negatively impact FZS and/or the Fozeus ecosystem in various ways. The Foundation, the Distributor (or their respective affiliates) may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction. After consulting with a wide range of legal advisors and continuous analysis of the development and legal structure of virtual currencies, a cautious approach will be applied towards the sale of FZS. Therefore, for the token sale, the sale strategy may be constantly adjusted in order to avoid relevant legal risks as much as possible.

2. Inadequate disclosure of information

As at the date hereof, the Fozeus ecosystem is still under development and its design concepts, codes, and other technical details and parameters may be constantly and frequently updated and changed. Although this white paper contains the most current information relating to the Fozeus ecosystem, it is not absolutely complete and may still be adjusted and updated by the Fozeus team from time to time. The Fozeus team has no ability and obligation to keep holders of FZS informed of every detail (including development progress and expected milestones) regarding the project to develop the Fozeus ecosystem, hence insufficient information disclosure is inevitable and reasonable.

3. Competitors

Various types of crypto management platforms and ecosystems are emerging at a rapid rate, and the industry is increasingly competitive. It is possible that alternative parties could be established that utilize the same or similar code and protocol underlying the Fozeus ecosystem and attempt to re-create similar facilities. The Fozeus ecosystem may be required to compete with these alternative parties, which could negatively impact FZS and/or the Fozeus ecosystem.

4. Loss of Talent

The development of the Fozeus ecosystem greatly depends on the continued co-operation of the existing technical team and expert consultants, who are highly knowledgeable and experienced in their respective sectors. The loss of any member may adversely affect the Fozeus ecosystem or its future development. Further, stability and cohesion within the team is critical to the overall development of the Fozeus ecosystem. There is the possibility that conflict within the team and/or departure of core personnel may occur, resulting in negative influence on the project in the future.

5. Failure to develop

There is the risk that the development of the Fozeus ecosystem will not be executed or implemented as planned, for a variety of reasons, including without limitation the event of a decline in the prices of any digital asset, virtual currency or FZS, unforeseen technical difficulties, and shortage of development funds for activities.

6. Security weaknesses

Hackers or other malicious groups or organizations may attempt to interfere with FZS and/or the Fozeus ecosystem in a variety of ways, including, but not limited to, malware attacks, phishing attacks, supply chain attacks, and brutal attacks. Furthermore, there is a risk that a third party or a member of the Foundation, the Distributor or their respective affiliates may intentionally or unintentionally introduce weaknesses into the core infrastructure of FZS and/or the Fozeus ecosystem, which could negatively affect FZS and/or the Fozeus ecosystem.

Further, the future of cryptography and security innovations are highly unpredictable and advances in cryptography, or technical advances (including without limitation development of quantum computing), could present unknown risks to FZS and/or the Fozeus ecosystem by rendering ineffective the cryptographic consensus mechanism that underpins that blockchain protocol.

7. Other risks

In addition, the potential risks briefly mentioned above are not exhaustive and there are other risks associated with your purchase, holding and use of FZS, including those that the Foundation or the Distributor cannot anticipate. Such risks may further materialize as unanticipated variations or combinations of the aforementioned risks. You should conduct full due diligence on the Foundation, the Distributor, their respective affiliates, and the Fozeus team, as well as understand the overall framework, mission and vision for the Fozeus ecosystem prior to purchasing FZS.

Vision

The vision of the Fozeus is to smoothly transition a significant part of the world's population into the world of decentralized finance, as well as to create new standards of living, new employment opportunities that allows to fight poverty and increase the level of financial freedom through the products of the ecosystem and the global involvement in these products. A decentralized ecosystem offers the most promising path to realize our vision of digital assets and services for daily life.

As a company, Fozeus has found a sustainable monetization model that doesn't compromise user experience or privacy. Rather than opting for mass display advertising or selling consumer data, Fozeus opted to adopt a decentralized organizational model, modularizing the data storage of the ecosystem's main engine, the SocialFi media platform – Fozeus.com. In close interaction with other products of ecosystem, its goal is to foster the development of a fair and open ecosystem of digital services. Fozeus prefers to be part of an economy that will be created in conjunction with the community and focused entirely on the needs of users.

In order to create an ecosystem that is not only open and decentralized, but also more attractive than what the market offers today, Fozeus must create a series of new products, services and systems. Building a decentralized system is a complex process, and the transition to it must be carried out in a balanced and responsible manner over time. The following sections of this document outline Fozeus' plan to launch a completely new ecosystem: the novel Fozeus ecosystem.

Mission

In a centralized financial system, governments can manipulate it to financially censor their citizens by freezing accounts, removing funds, denying access to payment systems or devaluing their own currency which leads to a hyperinflation.

A web of a few centralized entities which control the global financial market is a big risk. The dependencies can cause a domino effect and one bank after another has to be bailed out by the Governments with billion infusions to limit the damage. The ones that lose the most are always the poorest. All these risks & drawbacks have been well-known but without a real alternative there was no choice but to continue with the current system. That is about to change.

The proliferation of smartphones & internet access combined with the development of decentralized technologies like Blockchain is enabling us to completely overhaul the current global financial system & replace it with a new financial ecosystem which is fair, equitable & accessible to all.

We believe that novel Fozeus ecosystem would be a powerful solution to the above-mentioned problem. The ecosystem is envisioned as a list of its products that interact with each other and form this system – digital services and applications driven by the

community – that adopt the FZS cryptocurrency. The novel Fozeus ecosystem is intended as an independent and democratic governance body for the members of this ecosystem.

The principal functions of the novel Fozeus ecosystem will include the open governance of its resources together with other ecosystem products; the support and advancement of the technology related to FZS implementation; and all matters related to ecosystem membership.

The Fozeus ecosystem mission is to grow an open ecosystem of digital services that consumers can easily explore and find value in, while giving developers an open and sustainable platform to develop, deliver, and enhance those services and not just to attract users, but improve their standard of living by granting a financial freedom.

Values

“Dream big. It's the first step to success. Just like that saying, shoot for the moon, even if you miss, you'll land among the stars. So, aim high, aim higher than you ever thought you could because if it just wasn't meant to be, you'll still shine.”

We think big enough and take smart risks to do things that never been done before. Our team is not afraid to make tough choices that align with our long-term objectives and we know that it is always seems impossible until it's done.

We are ready, willing and able to take our community on a trip from idea to completion, as well as everything in between. Ladies and gentlemen, fasten your seat belts! We're setting off on a journey that will change the world!

Target Audience

Any successful business or product needs to understand its target audience. Based on the experience and researches of our team, we would like to highlight 4 main portraits of crypto investors with whom we plan to work.

Crypto investor “For Fun”

Perhaps this is the largest group of people in terms of numbers, and every day there are more and more such investors. The majority of “For Fun” investors are from developing countries - a layer of tech-savvy office workers who have small amounts of savings that they would be happy to invest in, but difficult to do that into a traditional business.

This group of investors know what is blockchain, cryptocurrency and DeFi; they will keep the conversation going in the elevator; they are up to date with the latest news because they regularly check cryptocurrency news portals.

We are taking in account that for them, advertising activity and recommendations in public play an important role. They rarely study the whitepaper, more often they look at it and the project site diagonally, so it is better for someone to retell the information from there in an "easily consumed form". Fozeus lightpaper would be prepared for them.

Geek enthusiast

A person who has been brewing in the "cryptoindustry" for several years and has already managed to get up well in activities related to blockchain and cryptocurrency. Geek enthusiasts believe in the very idea of cryptocurrencies and promote it in every possible way - they are also called blockchain evangelists.

The most interesting thing is that most of them are simple, modest guys who do not boast of their successes, and in the support chat you will not be able to immediately distinguish them from "For Fun" investors. But unlike the first ones, they are well versed in projects. In our opinion, to work with this group of people, it is important not only to have a valuable product, but a product with value for the crypto community, what novel Fozeus ecosystem we believe would bring.

Whales

Professional investors and investment funds that specialize in financial assets. These people have teams of analysts at their disposal to track and study interesting projects on the market. They carefully study the whitepaper, the team working on the project, and the activity in the communities. They have checklists by which they evaluate projects. We plan to meet with this group of investors in person and obtain consent for the investment in advance orally, through a whitelist or a formalized written agreement.

Classic investors

Oddly enough it may seem, but you should not discount classic investors who are not new to investing, but have not yet been drawn into the crypto industry. Many of them are stopped from participating in crypto projects by technical difficulties and misunderstanding of the very sphere of cryptocurrencies, blockchain and crypto investments.

For this type of investors, we will prepare a detailed video and detailed material with screenshots of how to buy Fozeus Coin (FZS) tokens. This can be extremely useful, by the way, not only for classic investors, but also simply for beginners in crypto-investing.

Introduction

The advent of the internet and mobile broadband has empowered billions of people globally by providing access to the world's knowledge and information, high-fidelity communications, and a wide range of lower-cost, more convenient services. These services are now accessible almost anywhere in the world.

Today, we are witnessing the next evolutionary leap: the assimilation of economic value into communication systems. Digital services such as social media and online payments have come to play a fundamental role in our daily lives, influencing not only our consumption behaviors, but also our discourse, politics, and methods of value exchange. Our digital communications platforms are becoming the most important media in the ongoing development of a global economy.

Blockchains have a number of unique properties that can potentially address some of the problems of accessibility and trustworthiness. Economic value and governance are distributed among the network's stakeholders rather than concentrated in a single and centralized organization. The stakeholders are its founders, investors, supporters, custodians, operators and, most importantly, its consumers. In these systems, economic value created by the decentralized organization is distributed among all participants, ensuring that the users who create it are compensated for their efforts.

Humanity would be well served by a digital ecosystem that fosters direct economic relationships between developers, creators, and consumers, with value and governance shared among the participants. Such an ecosystem would offer consumers a set of rich, diverse, and open digital services that put the user experience first.

To safeguard the key tenets of a market-based economy and prolong innovation in the technology sector, we believe the time is right for a novel ecosystem for digital communications and commerce that delivers more power to developers and consumers.

We would make all possible to combine the best aspects of blockchain-based technological innovation — distributed governance, open access, and security — with a robust compliance and regulatory framework. Developers, merchants, and consumers benefit from the compliance and security that is built into the Fozeus ecosystem. Technological innovation conducted in collaboration with the financial sector, including regulators and experts across a variety of industries, is the only way to ensure that a sustainable, secure, and trusted framework underpins this new system. And this approach can deliver a giant leap forward toward a lower-cost, more accessible, more connected global financial system.

With community support, Fozeus will build a universe-class ecosystem, powering the stable future of crypto finance and user welfare.

Fozeus Ecosystem

The Fozeus ecosystem consists of a large list of its products (some are already live) that interact with each other and form this system. These products would be linked together through blockchain technology and complement each other's existence.

Novel Fozeus ecosystem is positioned as the only one of its kind, having no competitors due to the scale of the products. FZS will be in the center of a new digital economy inside that ecosystem, driving demand and fundamental value for the cryptocurrency. Its resulting value will enable the launch of an economic incentive mechanism, to further grow the ecosystem.

Fozeus would invest heavily in developing its ecosystem which would be supported with a giant diverse community accumulated in its own SocialFi media platform with the same name - Fozeus.com. The main objective of a company has always been to increase the intrinsic value of its currency and trading technologies, as well as taking the adoption of cryptocurrencies to an unseen level.

After the release of the Fozeus Blockchain, all transactions will be carried out exclusively within the native protocol. According to a strategy of a company we plan to announce at least one ready-to-use ecosystem product or sub-product or partnership and integration quarterly. You can learn the full strategy in our space map. We will constantly add and update our space map to keep you informed.

The sections below describe detailed information about each product that is part of the ecosystem with a planned entry date until the end of 2023. This part of the products would be the core of the novel Fozeus ecosystem, which in the future would be overgrown with a huge number of sub-products.

Fozeus Coin (FZS)

Fozeus Coin (FZS) will be the only digital asset available as a means of payment across all products of the Fozeus ecosystem, such as Fozeus SocialFi media platform with unique dating and communication capabilities, Fozeus Franchise as the main tool for B2B collaboration with merchants, Fozeus Games that will include its main flagship game in MOBA genre and many more, with low fees and global transactions.

Introduction

Fozeus Coin (FZS) is planned to be a giant community-driven digital asset built to power the novel Fozeus ecosystem and govern the community. Fozeus Coin (FZS) progress is intended to create a broader range of network effects using its own SocialFi media platform - Fozeus.com. Rather than limiting itself to a single solution, Fozeus Coin (FZS) intertwines many decentralized markets and instruments. The core products would include a SocialFi media platform, native Blockchain with a number of sub-products, such as wallet and decentralized exchange with a wide range of yield instruments.

The main goal is to attract as many people as possible to the world of digital assets and solve global transactions problem with the integration of our ecosystem into the daily life of every inhabitant of this planet. Thanks to advanced technologies and great market influence, we believe that one global currency would make our life easier, the transactions safer with lowest transaction fees and quick transaction time.

Technology

Initially, the Fozeus team released their token called Fozeus Coin with FZS as the ticker running on the Binance Smart Chain (BSC) with standard BEP-20 and is limited to a maximum of 100 billion FZS tokens, of which 100 million are currently in circulation as of April 2023 (Contract address: 0xfc225919d42999d23de3b80ced99f427f97e779a).

After the release of its own blockchain, it is planned to switch to the native Fozeus blockchain crypto-coin with a transition period of six months, after which the previous tokens will be abolished from the ecosystem and native tokens will gain power and become valid.

The FZS token itself has multiple forms of utility, essentially being the underlying gas that powers the entire Fozeus ecosystem.

Why buy Fozeus Coin (FZS) now

- The main settlement currency of the novel Fozeus ecosystem would be Fozeus Coin (FZS). Thus, the holders of this token will become a full-fledged member of novel Fozeus ecosystem and will receive benefits from owning the tokens, such as the ability to multiply savings with a wide range of yield instruments and many more.
- Due to the company's huge investments and efforts in growing the community of the ecosystem, as well as in the development of an engine of that ecosystem – SocialFi media platform - Fozeus.com, the Fozeus Coin(FZS) liquidity would reach unprecedented heights and would lead the list of the most demanded tokens.
- Limited number of tokens - always does its job. Taking into account the fact that the plan of the Fozeus team is to attract 1/8 of the world's population to digital assets through the products of the Fozeus ecosystem, only 100 tokens will remain for each user, which will turn into a shortage. The law of supply and demand indicates that when there is a high demand for a product (Fozeus Coin), there will also be a high level of need for its supply. High demand with low supply is likely to increase the price of the product.

Allocation

Fozeus tokenomics plan was developed and drawn up with the participation of leading experts in the field of cryptocurrencies and macroeconomics. Every single distribution takes place on the basis of a contract to specific crypto wallet addresses, which are fixed by the contract, what provides a secure overview for the investors and token holders.

Token Allocation	Allocation (%)	Amount (FZS)	Vesting Schedule
Comity Allocation	55.00 %	55,000,000,000	4 years vesting, 2 years cliff, linear unlock starting from the 3 rd year
Fozeus SocialFi Rewards	30.00 %	30,000,000,000	2 years vesting, 6 months cliff, linear unlock starting from 1 st year
Exchange listings	7.00 %	7,000,000,000	100% release at TGE
Strategic	3.50 %	3,500,000,000	100% release at TGE
Branding & Marketing	2.50 %	2,500,000,000	1 year vesting, 50% release at TGE, linear unlock from the 1 st year
Research & Development	1.00 %	1,000,000,000	2 years vesting, 30% release at TGE, linear unlock starting from the 1 st year
Reserve Fund	0.90 %	900,000,000	3 years vesting, 1 year cliff, linear unlock starting from the 2 nd year
Private Sale	0.10 %	100,000,000	3 years vesting, 1 year cliff, linear unlock starting from the 2 nd year

Fozeus SocialFi

One of the main products of the Fozeus ecosystem will be Fozeus SocialFi. It will serve as a kind of engine for the entire ecosystem, bringing together users from completely different backgrounds and interests, offering unique solutions for interacting with each other. Also, this product will be the first of the entire list of products that allows its users to easily enter the world of digital assets, which has no analogues, divided into modules that would be completely ready for full decentralization after the release of the native blockchain.

Introduction

Fozeus SocialFi media platform would be made by the people and for the people, so that there won't be any needs to use another platform to fill all your daily needs. From simple relationship building, dating, chatting, posting short and long videos, creating group voice or video calls to business and communities. However, the icing on the cake is that the platform opens the door to cryptocurrency world and a life of financial freedom. The main bonus for the pioneers will be an integrated unique system for earning a Fozeus coin through daily interaction with the platform and attracting friends and relatives to your team. With the development of the product, the token could be used within the platform as an only payment unit, as well as it will be possible to withdraw the token to your wallet for multi-purpose use, for example, as payment for purchases in a local grocery store using a Fozeus Card or buy goods from online merchants by paying with a FZS token.

Technology

The Fozeus SocialFi media platform includes many unique features and sub-products, making it one of a kind. The platform will be divided into modules and will be fully decentralized with the advent of the native blockchain.

Unlike other platforms, Fozeus SocialFi media platform respects and values the time of its users by rewarding them for their activity with internal digital assets, that will be able to be used both within the platform and converted into tokens and used throughout the ecosystem and even beyond.

The exchange rate of the internal digital asset will be equal to 1:1 in relation to the Fozeus Coin (FZS). An internal-platform digital asset is created to prevent fraudulent schemes and hacker attacks from the outside on the main fuel of the ecosystem.

Future

Company would focus on building a giant community within the Fozeus ecosystem, especially using an ecosystem product such as Fozeus SocialFi media platform. The platform would meet all users' needs and moreover, the platform would create a financial freedom for all its users with little effort but great impact. The platform will create a huge number of monetization opportunities for both content and actions, where each user will decide for himself how long he wants to be engaged in that process, at what time to start and finish, and moreover, enjoy the whole process of monetization, because it does not tie to your location, time and workload.

Fozeus Payment Card

With the fully branded Fozeus Card, you would have a possibility to spend your digital assets from your balances, from the native Fozeus ecosystem products and partner platforms like Comity, at over 80 million merchants worldwide. Simply transfer your digital assets from your platform balance to your funding balance and you are ready to go. Spend your crypto anytime, anywhere.

Fozeus Pay

Pay and get paid with crypto. Fozeus Pay would be a contactless, borderless and secure cryptocurrency payment technology designed by Fozeus. Shop with crypto or send crypto to friends and family worldwide. The payment with Fozeus pay would be same easy as sending a message.

Fozeus NFT

Fozeus NFT product will be the first in the world to unfold the potential of a non-fungible token in all its glory and will not be limited only by its collectible rarity. Fozeus NFT will find its application in all products of the Fozeus ecosystem and will become a clear example of a technological breakthrough, taking the palm from previous projects in this field.

*NFTs, or non-fungible tokens, are digital assets that are unique and non-interchangeable. NFTs are stored on a blockchain, which is a distributed ledger that allows for secure and transparent transactions. NFTs can be used to represent ownership of digital or physical assets.

Fozeus Franchise

As the franchising represents an attractive means for expansion, Fozeus Franchise would give an amazing opportunity for every franchisee to start their own financial freedom as a business with a concept where the franchisor earns not on the franchisee, but with him/her. The more successful and efficient each franchisee works, the more successful the entire network and, ultimately, the franchisor himself.

Fozeus Franchise offers a great advantage, when you use it to its full potential. Fozeus Franchise enable franchisees to leverage their traffic and customer base in order to profit from e-commerce while merchants benefit from increased exposure and sales.

We used the standard brand-and-product franchise model, where the company promotes the brand, and you just have to offer the product to everyone, and in our case, this product is Fozeus Coin, our token.

Fozeus provides its franchisees with a unique opportunity to attract merchants to the use of FZS, thereby receiving a lifetime passive income from the merchant from all transactions in FZS.

It will be very easy to become a franchisee. After submitting an application and paying for a subscription, you will get access to the platform, which in turn will open up a unique opportunity to sell your products on the Fozeus SocialFi marketplace. Of course, loyalty to the entire ecosystem and its users is obligatory, which means for the merchant that it is obliged to accept FZS as payment for agreed part of the products, which in turn will increase the liquidity of the token.

Fozeus Marketplace

Fozeus Marketplace will bring together developers, artists, creators, and crypto enthusiasts on a single platform to create and trade both top decentralized products and those products that we are used to in everyday life – digital and physical products. The plan is to become the largest decentralized marketplace in the universe of DeFi.

Fozeus Blockchain

An obligatory component of any blockchain project is the native blockchain itself, with its own digital asset and, moreover, written in its own language.

First of all, it is a matter of reputation. We believe that if a company wants to make its mark in the crypto industry, then having a blockchain is the main thing to start with.

But we will go further, we want not just our blockchain in the existing language, we want to write our blockchain in our WEB3 language and the language will be called Fozean.

It will be an open protocol with a consensus team written with the help of everyone interested to share their skills through regular hackathons.

Fozeus DEX

When you create a native blockchain, then one of the components of the product is, by default, a decentralized exchange with a native token at the head. Fozeus plans to create own decentralized exchange, where trading would be easy and simple. You can buy high-cap cryptocurrencies, sell them, trade them for other crypto, or send them to other wallets, all within the one platform. The Fozeus decentralized exchange would support most top digital assets as well as the stable coins to help you avoid market volatility.

Fozeus Wallet

Another addition to the native blockchain is the wallet. Users will be able to use Fozeus Wallet to store digital assets with the possible lowest fees and ultra-fast transactions within the native blockchain. Easy connection of the wallet to the stores of loyal merchants and organizations will allow you to easily buy goods in a native digital asset or pay for services.

Fozeus Games

The first and flagship game will be a game in the MOBA genre - "multiplayer online battle arena." Where two teams of players fight each other on a special kind of map. Each player controls one character from a certain list of available heroes that differ in characteristics and abilities. During a match/session, characters can become stronger by acquiring new skills or upgrading old ones.

The company plans to enter IGO, an initial offering to raise funds for the game. It is planned to put up NFT scrolls and chests for sale, the owners of which will be able to use them to purchase heroes and cards with the release of the game.

By the time the IGO is released, a decision will be made on how the game will be implemented, with the help of a publisher, or whether its own team will be formed.

The first version of the game will immediately be released in 3D, after which the development team will begin to implement the VR version of this game using AI for augmented reality.

Fozeus Metaverse

With Fozeus Metaverse we want to create a real virtual reality in its entirety, and not what you are offered on the market today, and we will begin integration through the Fozeus SocialFi media platform, integrating VR technology into conference calls and Fozeus Games, in which the last stage will be a game in virtual reality.

We also understand that the scaling of the metaverse is possible with the introduction of ultra-fast technologies such as 6G into our lives. 6G networks are expected to be developed and released by 2030. By this time, we will be ready to fully translate our products into the native Metaverse, in which the user will receive a reality commensurate with expectations.

Space map

Q1 2021:

- Big Bang
- Idea and concept creation

Q2 2021:

- Research, strategic plan and team assemble
- Applying for a cryptocurrency license
- Building novel Fozeus ecosystem

Q3 2021:

- Whitepaper V.1.0
- Fozeus ecosystem educational website launch
- Fozeus Coin (FZS) token launch
- Applying for audit

- Fozeus SocialFi App Group Calls launch
- Fozeus SocialFi Scheduled Calls launch
- Fozeus SocialFi App Scheduled Calls launch

Q4 2023

- Fozeus NFT Launch
- Fozeus SocialFi App & Web Dating launch

Conclusion

The company's heritage would be an ecosystem with a large list of its products that would interact with each other and form that system. The products would be linked together through blockchain technology and complement each other's existence.

Novel Fozeus ecosystem's legacy will be in catalyzing a new, decentralized ecosystem of digital services for daily life. With native digital asset at its center, this ecosystem will be open and sustainable while putting users first.

Fozeus will pioneer a new economic model for digital services that empowers consumers instead of selling their attention and data to advertisers. In doing so, the company believes that the world will take great strides toward replacing the centralizing power, possessed by the largest players in the technology industry today, with the DAO.

With the aim of fostering a vibrant economy based around the Fozeus cryptocurrency, the company will pledge all its resources to make FZS the primary transaction currency in its ecosystem and promote its services to its millions of users. It will establish the company to manage and encourage growth of the novel Fozeus ecosystem, what would incentivize developers and creators to make new products and services.

Initially, the Fozeus team released their token called Fozeus Coin with FZS as the ticker running on the Binance Smart Chain (BSC) with standard BEP-20. After the release of its own blockchain, it is planned to switch to the native Fozeus blockchain crypto-coin with a transition period of six months, after which the previous tokens will be abolished from the ecosystem and native tokens will gain power and become valid. Fozeus blockchain will be using a hybrid on-chain and off-chain technology solution, with the goal of eventually transitioning to a fully decentralized and autonomous system. Native cryptocurrency will be used to compensate ecosystem partners based on each service's contribution to FZS' overall growth. The company will allow the cryptocurrency to become platform-agnostic, but Fozeus will leverage its large existing user base to drive mass adoption. As a result, FZS can scale to meet the interoperability demands of modern applications and become the basis for a new form of monetization.

Through this vision, FZS will bring to fruition a new era of decentralized community ownership, enabling a vibrant ecosystem of digital services that power daily life.

We would be grateful for the engagement and commitment of organizations and individuals in helping define this opportunity for the world. We are fully committed to the mission and have already started to implement it.
